TURN YOUR PRINT DATA
into GROWTH ENGINE FUEL

SPUR GROWTH *and*
SPEED THROUGH REVENUE

FMAudit™ *Central*
Data Repository & Customer Portal

DATA REPOSITORY & CUSTOMER PORTAL

With the print data from your customer accounts backed up in the FMAudit™ Central™ database repository at your location, you are the owner of a powerful informational resource that will help you provide better services for your customers, increase operational efficiencies and grow your business.

FUEL YOUR GROWTH ENGINE WITH:

REPORTS AND/OR BILLING > Connecting Central™ to your accounting system, ERP or CRM system, you can generate reports and/or billing invoices. With meter synchronization with Onsite™, your accurate and timely *invoices sail through customer approval with ease, resulting in quicker collection of your money!*

ONLINE CUSTOMER METER VALIDATION > As a customer portal, Central™ facilitates customer validation of meter readings online – *a convenience for you and your customers and a huge source of savings for you!* (Note: You can also extract data as .xls, csv, http and xml files.)

CONTRACT DEVICE MANAGEMENT > You get the data you need to optimize contract efficiency for both you and your customers – *savings for your customer, increased revenues for you.*

CROSS ACCOUNT ANALYSIS > You can compare account assets by consumption, geography, industry, account manager and other variables – *spot trends, manage sales and data mine for golden opportunities to increase business.*

BETTER TECHNICAL SERVICES > Central's Device Dashboard lets you see an easy-to-read virtual representation of critical service alerts – technical support, toner low, etc. – *your customers get better service, you get better revenues.*

HOW FMAUDIT™ CENTRAL™ WORKS

Residing at your location, Central™ is a backup database repository for the print asset and metering data gathered using any or all of FMAudit's family of data collection products:
Viewer USB™ (portable USB device; download collected data for backup)
Onsite™ (resident on customer network; automatic, synchronized feed into Central™)
WebAudit™ (internet based data collection; synchronized feed into Central™)

WHEN USED VIEWER USB™

Central allows you to protect and save valuable meter readings and audits in one central repository that stays with you, regardless of where the USB key goes.

WHEN USED WITH ONSITE™

Central™ can synchronize and consolidate as many Onsite™ metering data feeds as you need without any third party involvement. No ASP! The data is secure and confidential.

Start revving your growth engine with print data that is accurate, timely and all yours to explore – to spur growth and to speed through revenues.
